## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Duncan et al, 6,238,277 in view of Chen et al, 4,369,543, as set forth in the previous Office action. '277, figures 1 and 3, and column 8, lines 25-26, discloses that three grinding disks are preferred, but that any number can be used as desired.

### ***Response to Arguments***

3. Applicant's arguments filed 02 April 2007 have been fully considered but they are not persuasive. Applicant argues that '277 does not recognize or contemplate any sideways drifting to the extent that the preferred embodiment included three grinders. The fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985). Here, '277 clearly teaches that any plurality of grinders can be used. That an even number of grinders would prevent drifting is moot, applicant has not provided evidence that such structure would not have been a natural consequence of using an even number of grinders, be it two, four, six, etc. In response to applicant's argument that the examiner's conclusion of obviousness is based upon

improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned *only* from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). Applicant's argument that the combination of teachings from the floor cleaning art, specifically machines used in construction sites, and the floor cleaning art, specifically a vacuum cleaner are non-analogous are noted. It has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, here, both references are from the field of applicant's endeavor, surface cleaning, and are both reasonably pertinent to the particular problem with which applicant was concerned, that of controlling the device during operation. That one surface cleaner is larger, or has a different motive means, is moot, both devices deal with surface cleaning, and with the problem of controlling the surface cleaning. Applicant has not claimed any structure that is not taught by the combination of '277 and '543.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
